METRIC

VARDEX THREAD TURNING (TT)

FS LINE

Fully Sintered Inserts

- Economical solution for all industries
- The program offers 62 of the most popular profiles for external and internal inserts
- IC range: 1/4" (11), 3/8" (16), 1/2" (22)

ALCN

External TT Toolholders with Two High Pressure Coolant Outlets

- Two precise high pressure coolant outlets, designed to cool the top and bottom of the insert for longer tool life and chip evacuation
- Up to 70 bar
- Three different coolant inlets available
- Bottom inlet, specially designed for VDI DIN 69880 / ISO 10889

ALCS

External TT Toolholders FOR SWISS TYPE MACHINES with High Pressure Coolant (HPC)

- Two dedicated inlets for Swiss type machines, accessible from both sides of the holder
- Back and bottom coolant inlets also available for conventional machines

ALC

External TT Holders for Oil&Gas with High Pressure Coolant

- Precise coolant thru, designed to efficiently cool down the cutting edge
- Suitable for high pressure coolant up to 70 bar
- Better chip evacuation and improved chip control and flow

V-CAP

Internal & External Toolholders for IC1/2" (22)

EXPANDED LINE

- Suitable for IC1/2" (22) insert size
- Polygon shaped shank, complies with standard ISO 26623
- High Pressure Coolant up to 70 bar for better chip evacuation and increased tool life

SMOOTH CUT SYSTEM

Modular Toolholder Heads for Anti-Vibration Shanks

- Modular head for anti-vibration system
- Same head can be used with wide range of shanks of different lengths
- Maximum overhang 5xDa (Da - shank diameter)

TMSD Modular

Modular Toolholder Heads for the TMSD Line

- One modular toolholder head fits an assortment of shank lengths
- Compatible with the most common steel and carbide shanks in the market

BELL SHAPE SYSTEM

High Productivity Design for External Thread Milling Applications

- Short toolholder movements for dramatically reduced machining time
- Enclosed holder structure
- Massive coolant thru with 12 outlets
- Inserts with 2 cutting edges

TM Solid MultiFlute

Increased Number of Flutes for Faster Machining

- Reduced machining times: Up to 40%!
- Large number of flutes (max 7)
- Available in 2xDo and 3xDo (thread diameter)
- Thread Standards:
 ISO Metric (mm shank): M3x0.5 to M16x2.0

TM Solid TMDR

Drilling, Thread Milling & Chamfering - Expansion: ISO, BSP (G), NPT, BSPT

EXPANDED LINE

- TMDR tools drill, thread and chamfer all in one tooling operation
- Pre-drilled holes are no longer required!
- Drilling and thread milling are done simultaneously, while chamfering is produced at the end of the operation

MiTM Offset

Fast Machining for Large Pitches in Deep Holes

- Reduced machining time: Two cutting rows, with each row machining half the thread simultaneously
- Cylindrical steel holders and shell mills are available
- Up to 2.5xDo (thread diameter)

TM Solid Millipro Dental

Reinforced Miniature Thread Mills for Dental Implants

- Reinforced overhang for better stability
- Specifically designed for the dental implant industry
- Increased tool life
- Now with 3 flutes and 3 teeth

GROOVEX

MINIATURE MACHINING

ST-Cut

Precise Tools for Small Parts Machining

- Unique insert replacement system
- Quick and easy change of insert inside the machine from both sides of the tool
- High repeatability of the cutting edge on all axes
- 17mm maximum parting off diameter, with up to 3mm notch width
- Excellent rigidity
- Insert edge treatment for increased tool life

GROOVEX

MINIATURE MACHINING

microscope

Micro Tools for Small Bores

The **Microscope** line offers new and improved solutions for micro boring, grooving, chamfering and threading in bores as small as 0.7 mm.

The **Microscope** line offers a large and extended range of single-ended inserts and a full range of toolholders with a simple clamping system.

VARDEX

GROOVEX

Introducing
VARGUS Solutions
for the Medical
Industry

VARGUS
Medical

The VARDEX and GROOVEX lines provide standard and customized tools for common medical applications such as: Parting Off, Turning, Grooving, Thread Milling, Thread Turning, Whirling, Boring and Broaching.

VARDEX

V-WHIRLING

High precision whirling system for medical and micromachining applications

Now available in the
VARGUS GENIUS™

HIGH feed
mm/flute
MACH TM

ADVANTAGES

- ✓ High feed mm/flute
- ✓ Dramatically decreases machining time
- ✓ Extended tool life
- ✓ Excellent surface finish

UNMATCHED PRODUCTIVITY

FEWER PASSES
FOR MACHINING
MACH TT

ADVANTAGES

- ✓ Significantly reduces the number of passes
- ✓ Dramatically decreases machining time
- ✓ Extended tool life
- ✓ Excellent surface finish

PATENT PENDING

GROOVEX

VG-Cut

Complete Range of Turning Solutions

VG-Cut tools provide a wide range of applications and options within the same insert pocket. VG-Cut inserts also offer a variety of chip formers and carbide grades, and are designed with a unique multifunctional and diverse geometry, to minimize inventory for the end-user.

GROOVEX

microbroach

Dedicated Broaching Tools for Hexagon and Torx® Sockets

- Unique VARGUS design
- Fits popular driven tools
- Sockets range:

Hexagon sockets
2.5 mm – 10.0 mm

Torx® sockets
TX15 – TX30

VARDEX

GEAR MILLING

Advanced Technologies for Gear, Spline and Rack Manufacturing

Standard (Generic) Tools

Suitable for all standard and tailor-made inserts

End Mill

Shell Mill

Disc Mill

Tailor-Made Tools

- Toolholders (End Mill, Shell Mill, Disc Mill) with indexable inserts
- Solid Carbide

VARDEX

V-TAPS

Advanced Tapping Solutions

- Four different geometries in an assortment of grades
- Suitable for blind hole and through hole operations
- Tools are designed to work on a wide range of materials

Now available in the
VARGUS GENIUS™

VARGUS GENIUS™ Tool Selector and CNC Program Generator

The Most Popular and Advanced Thread Turning, Thread Milling, Tapping and Whirling software on the market today.
